

Final Business Insights Report

Introduction

This analysis was conducted on the Sales Dataset containing 5091 orders across multiple regions, customer segments, product categories, and shipping modes. The analysis covers revenue, profitability, regional performance, product performance, customer segments, sales trends, and category contributions over the 2019–2020 period.

Key Business Insights

Key Strengths

- Strong overall sales growth (177%)
- Consistent increase in monthly sales
- High-performing West and East regions
- Office Supplies is a stable revenue generator
- Consumer segment drives the majority of sales

Key Challenges

- The South region shows significantly lower performance compared to other regions.
- Multiple products are generating negative profits.
- Overall profit margin is modest relative to total revenue.
- Sales are heavily concentrated in specific regions and customer segments.

INSIGHTS AND RECOMMENDATIONS

1. Business Performance Overview

KPI	Value
Total Revenue	\$1.57 Million
Total Profit	\$175.26 Thousand
Total Orders	3,003
Total Quantity Sold	22,000 Units
Overall Growth Rate	177.29%.

The company generated **\$1.57 million in sales** and achieved a **177.29% growth rate**, showing strong business growth. It earned a **profit of \$175.26 thousand**, which is around **11% of total sales**. This means the company is selling well, but it can improve its profits by managing costs better and focusing on more profitable products.

2. Sales Trends Analysis

Sales demonstrate a clear upward trend from 2019 to 2020. Sales remained stable throughout 2019 and noticeable growth was observed during 2020. Peak monthly sales reached approximately 166K and highest sales were recorded in Q4 2020.

The consistent upward trend indicates increasing customer demand, effective sales strategies during the final quarter of the year.

3. Sales by Region

West region is the highest-performing region, contributes approximately one-third of total revenue. East Region is the strong second-largest market. Sales performance is heavily concentrated in the West and East regions, while the South region has the lowest sales among all regions requires immediate attention.

4. Sales by Category

Office Supplies contributes the highest revenue. Technology and Furniture perform similarly, although they remain below Office Supplies. Office Supplies represents the company's strongest and most reliable revenue stream.

Continued investment in this category is likely to generate the highest return.

5.Customer segment Analysis

The Consumer segment drives over 50% of all orders and is the main source of revenue. Corporate customers form a strong secondary market. The Home Office segment has the lowest share of orders.

To sustain growth, the company should focus on customer satisfaction in the Consumer segment.

6. Top 5 Selling Products

Top-selling products mainly include office equipment such as printers, copiers, and binding systems. Customers prefer office productivity equipment.

Focus on technology and document management products drives revenue.

7.Top 5 loss-making products

Top 5 loss-making products are, Cindy Stewart, Grant Thornton, Sharelle Roach, Henry Goldwyn, Nathan cano. The losses may be due to high discounts, poor pricing, high shipping costs, or low-margin sales.

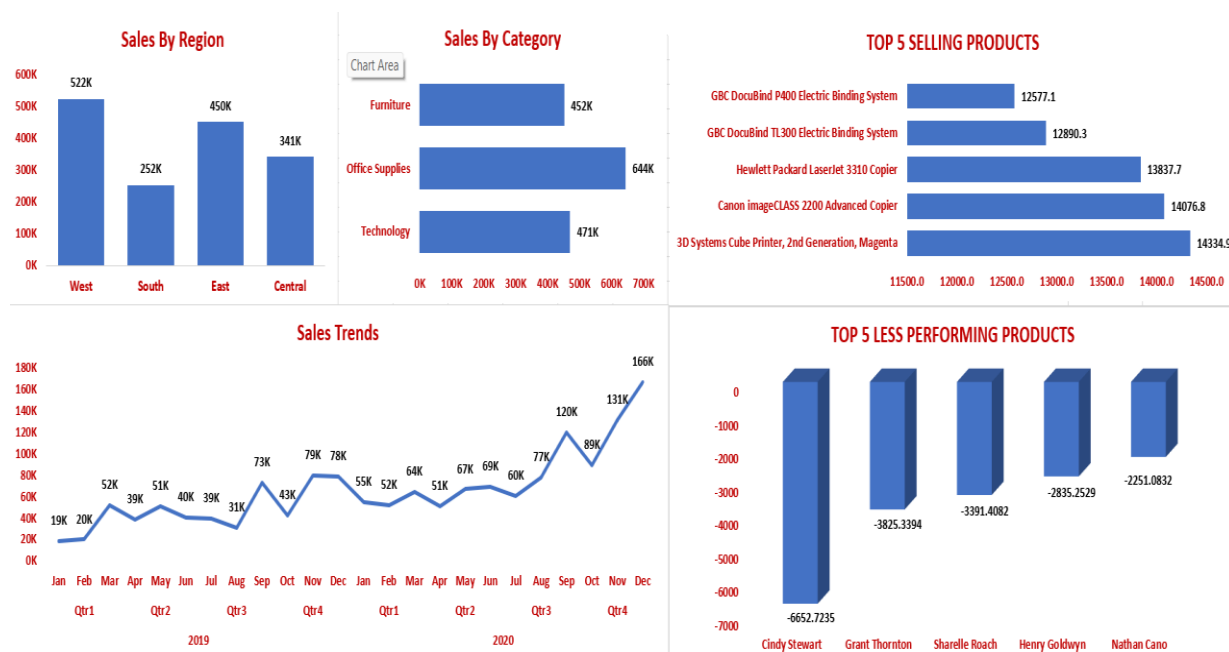

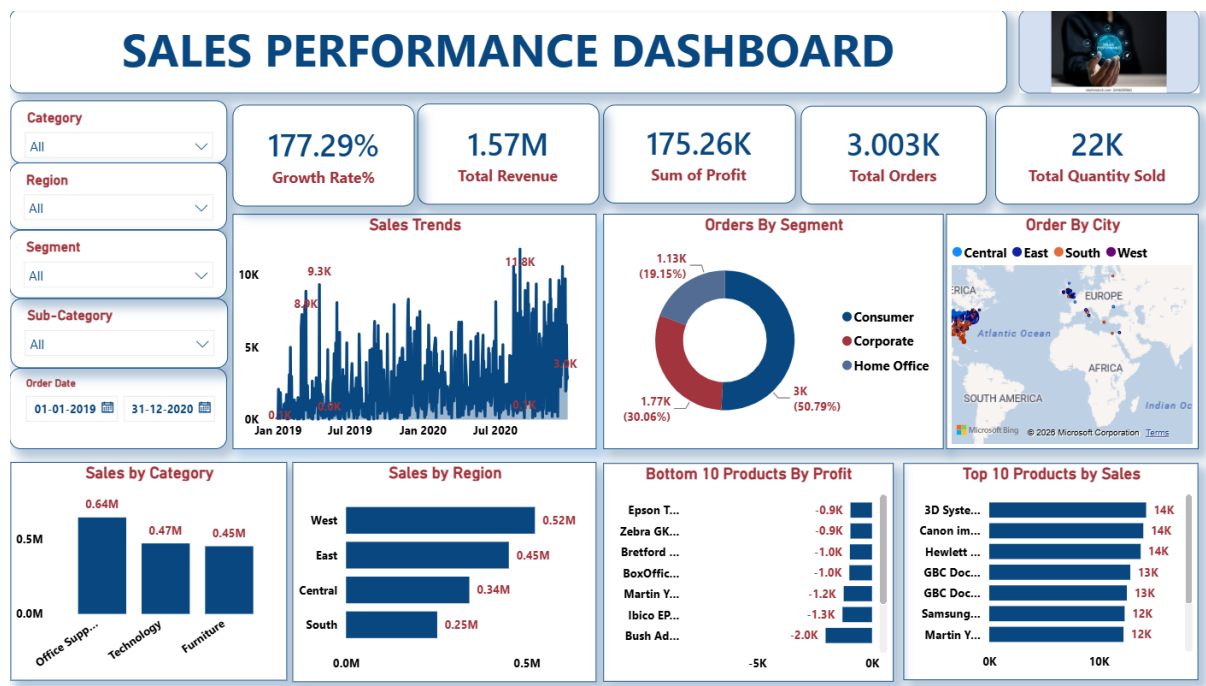

Further analysis is needed to identify the root causes and take corrective action.

8.Profitability Analysis

Total revenue was \$1.57M with a profit of \$175K.High sales volume does not guarantee high profitability.Some products generate revenue but have low or negative profit margins.Discounts and operational costs are likely reducing overall margins. Focus needed on profitable products.

RECOMMENDATIONS

- Strengthen Sales in the South Region
- Increase Focus on High-Margin Products
- Review Underperforming Products
- Improve Profit Margins
- Expand Corporate Sales
- Prepare for Peak Seasons
- Develop a Product Portfolio Strategy

CONCLUSION

The Sales Performance Dashboard shows strong business growth with **\$1.57M** in revenue and **177.29%** growth during the reporting period. Growth is mainly driven by the **West region, Office Supplies category, and the Consumer segment**. Monthly sales remained steady and peaked in Q4 2020.

Improving profitability requires addressing product losses, boosting South region sales, and better cost control. A focus on high-margin products and corporate expansion can drive sustainable growth
